• THE SITUATION

The Hard Part Is Already Solved.

Survival 401k has spent twelve years building something clients stay with for years and refer on: a white glove service, delivery automated down to a one-click, eleven-document build, and an 85 to 90 percent close rate once a conversation starts. What slowed sits entirely at the top of the funnel. The podcasts and referrals that once brought five plans a day have quietened, and a finder's fee stream worth around \$300,000 a year fell away, with no structured system stepping in to replace that flow. Past ad attempts drew impressions but no clicks, so the volume never came back. That top-of-funnel engine is the one piece left to build, and it is the piece we do.

12_{yrs}

In business, roughly 550 clients served.

85-90%

Close rate once a conversation starts.

1-2_{/mo}

New clients today, against room for 10 to 20.

• WHAT WE BUILT YOU FIRST

Before we ever spoke, we rebuilt the Survival 401k offer as a live, branded funnel, the same structure that acquires our own clients. Here it is:

But be clear: what this is, right now, is a **shell**. A page on its own is a parked car. It looks the part, yet it does not move. Three things make it actually drive, and all three are missing.

• WHAT WE DO • THE THREE GAPS WE FILL

Offer. Video. Traffic.

This is the difference between the free page and a page that fills the calendar. Each gap is a problem that is hard to solve from inside the business, and each one is what the fee covers.

1

The Offer

"The page is only as good as the offer on it."

WHAT WE DO A focused hour together, combining your twelve years of knowing this client with our pattern library from running dozens of funnels, to engineer the Survival 401k offer into a **cold-traffic-ready** message people actually opt in for.

WHY IT MATTERS The Facebook, Google and Gab ads drew impressions but no clicks, and the \$100-off page never moved, because a page is only ever as good as the offer on it. The offer is the single biggest lever on the whole funnel, and the hardest thing to see from inside the business.

THE RESULT A message cold prospects respond to instead of scroll past. The difference between wasted spend and a calendar that fills.

2

The Video (VSL)

"A salesman that works while you sleep."

WHAT WE DO We **script and edit** the video sales letter for you, on a proven structure: hook, problem, mechanism, proof, call to action. No writing or filming burden on your side.

WHY IT MATTERS You close 85 to 90 percent once you are talking, but today that warming only happens after someone heard you on a podcast or got you on the phone, and it does not scale. The VSL does that warming before the call, at scale, so prospects arrive already sold.

THE RESULT Higher show-up, higher close, and that same close rate holding up on **strangers**, not only referrals and podcast listeners.

3

The Traffic

"A billboard in the desert sells nothing."

WHAT WE DO **Included, done for you:** we build a reactivation newsletter from your CRM, LinkedIn, and years of email contacts, and drive it to the page for 90 days.

THE BONUS Want to move faster? Put a budget behind Meta ads and **we build and manage it at no extra cost**. Never required; the newsletter carries the guarantee alone.

THE RESULT The booked calls we guarantee, from an audience that already belongs to you.

• THE GUARANTEE

5 booked calls in 90 days, or we keep working **free**.

We guarantee only what we control: qualified calls on the calendar. Not closes, not revenue, those stay yours. If we do not deliver the five, we do not walk away. We keep going until they are there.

• THE MODEL, ON REAL NUMBERS

What the guaranteed minimum looks like

This deliberately assumes a close rate of 60 percent, well under your real 85 to 90, and a conservative average client value drawn from the numbers you gave us. Only the five booked calls are guaranteed.

INPUT	CONSERVATIVE FIGURE
Guaranteed booked calls	5
Close rate (real rate is 85 to 90%)	60%
Average client value	\$3,500
New clients off the guaranteed floor	≈ 3
Revenue off the guaranteed floor	\$10,500
The investment	£2,500 (≈ \$3,000)
Estimated return on the guaranteed minimum	≈ 3.5×

And that is the floor. At the 85 to 90 percent you actually close, five calls is closer to 4 clients, around \$14,000, roughly 5 times over. Every client then keeps paying the annual compliance fee for years, and add-ons like the LLC setup compound well beyond this table.

These figures are estimates built from the numbers you shared with us, and depend on your own close rate and pricing.

Prefer to run your own numbers? Model them in the live calculator.

• PROOF

The same system, already working.

A few of the businesses running this exact structure with us right now.

\$40k → \$180k
per month

Liam Evans
Unorthodox Digital

"You've saved me time and made us money. The business is only as strong as the systems it's built on, and what you built us is world-class."

\$0 → \$40k
per month

Kasey Jones
Essentialist CEO

We averaged around 550 leads a month for Kasey through her funnel, starting with the newsletter and then evolving into paid traffic.

\$50k → \$90k
per month

Matthew DiMarcantonio
Ember

Grew to a consistent \$90k a month through his funnel, and is now doubling his marketing input and spend on the back of it.

• THE ROADMAP · A 90-DAY INTRO ENGAGEMENT

£2,500

approx \$3,000 · one-time

We bill in GBP, but that is roughly **\$1,000 a month** to conservatively generate around **\$10,500** in new business from the guaranteed calls, and very likely more. The complete 90-day engagement, funnel live in 7 days, with a five-call guarantee behind it.

Want to save \$700?

Introduce another business owner who wants more booked calls, and if they come on board with us, we knock **£500 (roughly \$700) straight off your engagement**, refunded the moment they close. The easiest way to set it up is a quick three-way WhatsApp with you, me, and them.

● STRAIGHT ANSWERS

The questions worth asking

"Why would paid traffic work when the ads I ran didn't?"

Because this does not start with cold ads. It starts by fixing the offer and warming every visitor with a VSL, and the included traffic comes from an audience that already knows you, your clients and contacts, not cold spend. The ads that failed had none of that behind them.

"Why pay when I could just take the free funnel and run?"

The page is yours either way. On its own it is a shell, with no offer engineered onto it, no VSL, and no traffic pointed at it. The engagement is what turns it into something that actually books calls.

"Do I also have to pay for ads on top of the fee?"

No. The reactivation newsletter is included and carries the guaranteed calls on its own. Meta ads are an optional bonus, only if you ever choose to scale faster, and we build and manage them at no extra fee.

"I don't know how we would actually use the funnel day to day."

You do not manage it. We build it, drive the traffic to it, and qualified prospects land on your calendar. Your only job stays the part you are already excellent at: the 30-minute call where you close 85 to 90 percent.

"I want to look over the funnel before I commit."

Completely fair, and exactly what this document and Friday's call are for. Take your time with it, then give a straight yes or no.

The next step

We speak again **Friday**. Take a proper look at the funnel and this proposal beforehand. On the call we will answer anything still open, and the one thing we ask is a clear yes or no, so we both plan our time well. If it is a yes, the seven-day build starts that day. If it is a no, no hard feelings, and the page is yours to keep.

P.S. What stayed with me from our call was why you want this fixed. Not to hoard it, but because the surplus is what funds the giving you do in Africa, and that stream drying up is what stopped it. That is a rare reason to build a business engine, and exactly the kind worth building one around. Speak Friday.
