
CLIENT ACQUISITION PROPOSAL

Lysi Solutions

A paid acquisition system that puts vetted construction firms on your calendar, paced to the two or three workshops a week you actually want to deliver, and guaranteed to pay for itself in its first 30 days.

PREPARED FOR

2026

GUARANTEE WINDOW

48 hours from
receipt

• THE SITUATION

The workshop is proven. The prospecting is the cost.

Lysi sells a one-day workshop that produces live project leads on the day, refunded if it does not, and that refund has not been needed in years. Delivery and closing are not the gap. What eats the working week is everything before the booking: finding firms, vetting them, then finding out the good-looking ones are not good people. Those are the hours a paid system takes off your desk, so delivery days go to delivery.

20+ yrs

Since 2005, across 50-odd construction SIC codes.

£5k

Per workshop, paid up front, with your own same-day guarantee.

2-3/wk

The delivery pace you want, up from the one or two you juggle today.

• WHAT CHANGES

Instead of you starting every conversation, the right firms find you. Meta ads put your offer in front of contractors in London and the home counties, a short application filters out the wrong sector, the wrong size and the wrong postcode, and the ones that pass book a call on your calendar. You still make the judgement on who deserves it. You just stop spending the week finding them.

On the call you asked whether anyone could run marketing around the way Lysi has to work. Yes, and we have done it before for clients who refuse to serve competing firms. These three rules go into the build on day one:

✓ BUILT IN

Sector exclusions

Once you deliver to an electrical contractor, that SIC code is excluded from the ads and the application for six months. We cycle through the rest.

✓ BUILT IN

Geography exclusions

London and the surrounding counties only, and once a sector is served in Surrey, the same sector in Hertfordshire can still book. Both rules run together.

✓ BUILT IN

Paced, not flooded

At the spend we recommend, bookings arrive one at a time, never ten at once. A waiting list holds anyone you cannot deliver to yet.

We build the qualification from your criteria, the funnel enforces it, and the calendar only opens on the days you choose. The summer holidays, school runs and cover days are yours to block out.

• WHAT WE BUILD, RUN AND OPTIMISE FOR YOU

The Optimally Scaling System

Five parts, all built, run and optimised by us inside accounts you own.

1

Offer, Market & Messaging

Every page and ad after this is downstream of it.

WHAT WE DO

Your existing marketing walked end to end, research into who Lysi should attract and turn away (from your best clients, not your average ones), calls and objections mined, then your **Offer & Messaging Document** written: promise, mechanism and proof in one place.

YOU GET

A positioning a hands-on contractor understands in one read, and the document everything else is built from.

2

Funnel Strategy, Design & Development

Custom coded, so it qualifies, tracks and changes without breaking.

WHAT WE DO

Funnel architecture, page copy and a VSL script in your buyers' language, then a custom-coded, mobile-first build on your domain. Qualification enforced server side with a polite exit for the wrong fit. Booking, CRM, reminders and lead notifications wired in and tested before any spend.

YOU GET

A live funnel that loads in under a second and only lets the right firms book.

3

Paid Advertising & Creative

Run inside your own ad account. Spend goes from you to Meta directly.

WHAT WE DO

Campaign setup, audience strategy and continuous management inside your own Meta account. Static creative in batches from the research, video ads scripted for you to record on a phone and cut by us, something new always in test.

YOU GET

Live campaigns you own, a creative pipeline that does not stop, and a cost per booking that keeps being worked on.

4

Tracking, Attribution & Analytics

Which ad produced the client you closed, not just what an ad cost.

WHAT WE DO

Conversion tracking and Meta Pixel captured in the browser and confirmed server side. Only qualified leads reported to Meta as conversions, so the algorithm hunts buyers. Every lead tied to the exact ad that produced them, click to booking to sale.

YOU GET

A straight answer to which spend produced which workshop, on a dashboard you can open any time.

5

Optimisation, Advisory & Scaling

Find the one thing holding the system back, fix it, move to the next.

WHAT WE DO

The weakest link found, fixed and re-measured each week. Copy, design and qualification revisited as the data says what is true, sales-process notes where the loss is on the call, spend raised against a financial model at a pace you can deliver to.

YOU GET

A system that gets better every month rather than ageing, paced to your calendar.

• THE GUARANTEE

Make back what you put in within 30 days, or we refund our fee **in full**.

In the first 30 days the system is live, revenue from workshops sold to leads it booked must be at least what you put in: our fee plus your ad spend, a return on ad spend of one or better. If it is not, and the conditions below were met, every penny of our fee comes back. One £5,000 workshop clears the bar on its own. The guarantee is for fast movers: it applies when you go ahead within 48 hours of receiving this proposal.

What the guarantee depends on. Same conditions we ask of every client, so the guarantee reflects the system run as designed:

- ✓ **Decide within 48 hours.** The guarantee is reserved for fast action takers: go ahead within 48 hours of receiving this proposal and it is yours. After that the engagement stands, without it.
- ✓ **Ads run every day.** Your Meta account stays funded at not less than US\$50 a day (about £37, roughly £1,150 a month) for all 30 days, no pauses or cuts. We recommend £1,500 a month.
- ✓ **The clock starts at launch.** The 30 days begin the day the first paid impressions run, not the day you sign. The build week is separate.
- ✓ **A real calendar.** At least ten bookable hours a week across three or more working days, on the days you choose. Holidays blocked out in advance.
- ✓ **You take the calls and close at least 20 percent.** Every call the system books is held and run through your normal sales process, and at least one in five of them becomes a client. Well under your real rate.
- ✓ **Outcomes logged within 24 hours.** Held, missed, sold and cash collected, entered in your dashboard after each call. This is how revenue and close rate are counted.
- ✓ **Qualification agreed up front, no unagreed changes.** Sector, geography, size and exclusions come from your onboarding form. Funnel, ads, offer, price and spend then stay as agreed unless we change them together.
- ✓ **Fee only, claimed within 7 days.** The refund is our £1,000 fee; ad spend is paid to Meta and not refundable. Claim in writing within 7 days of the window closing, after a short exit call.

• THE MODEL, ON REAL NUMBERS

What the first 30 days looks like

A conservative estimate on your own numbers at a 50 percent close: well under the near one-to-one you actually run, above the 20 percent the guarantee asks for. The threshold in this model is £2,500.

INPUT	30-DAY ESTIMATE
Booked calls (first 30 days live)	≈ 5
Close rate (yours is close to 1:1)	50%
Workshop fee	£5,000
New clients	≈ 2
New revenue	£10,000
Your investment (our fee + ad spend)	£2,500 (£1,000 + £1,500)
Estimated return	≈ 4×

An estimate from the numbers you shared on the call. Only the guarantee above is promised.

• PROOF

The same system, already working.

A few of the businesses running this exact structure with us right now.

\$40k → \$180k
per month

Liam Evans
Unorthodox Digital

"You've saved me time and made us money. The business is only as strong as the systems it's built on, and what you built us is world-class."

\$0 → \$40k
per month

Kasey Jones
Essentialist CEO

We averaged around 550 leads a month for Kasey through her funnel, starting with the newsletter and then evolving into paid traffic.

\$50k → \$90k
per month

Matthew DiMarcantonio
Ember

Grew to a consistent \$90k a month through his funnel, and is now doubling his marketing input and spend on the back of it.

The weakest link found and worked on each week. Where the loss is on the call, we tell you. | <ul style="list-style-type: none"> ✓ The guarantee
Make back the fee and the ad spend within the first 30 days live, or our fee is refunded in full. |

• THE ROADMAP

£1,000/month

plus ad spend · rolling monthly · no fixed term

We bill in GBP, monthly in advance, and either side can end it on 14 days' notice. The £1,000 covers all five parts of the system: build, creative, management and the weekly call. **Ad spend is separate and paid by you directly to Meta:** US\$50 a day is the guarantee minimum, and the model assumes £1,500 a month.

Your dashboard

Every lead, booking, ad and number in one place, live.

A shared Slack channel

Leads land there as they come in. Questions answered the same day.

A weekly call, if you want it

Up to one a week with Reuben or your CSM. Skip it and the work carries on.

● STRAIGHT ANSWERS

The questions worth asking

"Can you really juggle the sector and geography restrictions?"

Yes. Each served sector goes into an exclusion list for six months, geography is layered on top so the same trade in a different county can still book, and the application asks both before anyone sees your calendar. We run the same rules today for clients who will not work with competing firms in one area.

"I'm a one-man band with limited delivery days. Am I too small for this?"

No. Two workshops a week is £40,000 a month, and that is the pace we build for. At £1,500 a month in spend, bookings arrive one at a time; you will not be turning nine away because you signed one. Anyone you cannot fit goes on a waiting list, and the calendar only opens on the days you have cover.

"Does £1,500 in ads plus your fee actually turn into a £5,000 workshop?"

That is the whole bet, and it is the one we guarantee. At your close rate, one qualified booking in the first month pays for the fee and the spend twice over. If the revenue from the leads we book does not at least match what you put in, our fee comes back.

"I've been let down by marketing before. Why is this different?"

Because you are not paying for activity. Every lead is tied to the ad that produced them, every outcome sits on a dashboard you can open, and if you move within 48 hours the first 30 days are underwritten by a refund. If it does not solve the problem, you have lost a month of ad spend and nothing else.

"Will I still vet people myself?"

Always. The system filters on sector, geography and size before the call, so the obvious misfits never reach you. The judgement on whether someone is a decent person to hand your process to stays with you, on a call that costs you thirty minutes instead of a week of research.

The next step

Watch the short videos on each of the five parts at optimally.ltd/deliverables, then reply to the email this came with and we will send the payment link. Once the first month is paid, the onboarding form lands in your inbox the same day, we agree the sectors and counties to exclude, and the build starts. Go ahead within **48 hours** and the 30-day guarantee on page 4 is locked in.
